

## USER INSTRUCTIONS

Read all instructions prior to collection

### Collection precautions:

**Do NOT eat, drink, smoke or chew gum for 30 minutes before giving your saliva sample.**

**Do NOT remove the plastic film from the cap.**

**Intended use:** For the collection of human DNA from saliva samples.

**Contents:** Kit contains stabilizing liquid.

### Warnings and precautions:

Wash with water if stabilizing liquid comes in contact with eyes or skin. Do NOT ingest. See MSDS at [www.dnagenotek.com](http://www.dnagenotek.com).

**Storage:** 15°C / 25°C

### Summary and explanation of the kit:

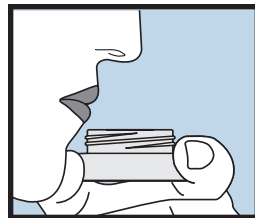

Oragene-DISCOVER is a self-collection kit that provides the materials and instructions for collecting and stabilizing saliva specimens.

### Label legend:

	Consult package insert
	Collect saliva by (Use by)
	Catalog number
	Caution, consult instructions for use
15°C / 25°C	Storage instructions
	Manufacturer
	Lot number

### Procedure:

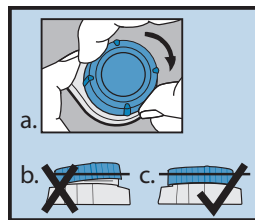

**Most people take between 2 and 5 minutes to deliver a sample following steps 1 to 4.**

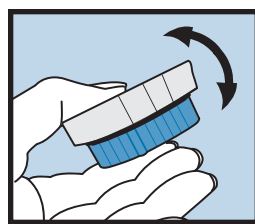

**1** Start giving your saliva sample.

**2** Spit until the amount of liquid saliva (not bubbles) reaches the level shown in picture #2.

**3** Put the container on a flat surface. Screw the cap onto the container. Make sure that the cap is closed tightly, as shown in picture #3c. If you have difficulty closing the cap completely, turn cap slightly counter-clockwise then try again.

**4** Shake gently for 10 seconds. Recycle outer packaging.

**For Research Use Only**  
Not for use in diagnostic procedures
